## **Pandoc**

Synopsis. pandoc [options] [input-file].... Description. Pandoc is a Haskell library for converting from one markup format to another, and a command-line tool that uses this library.. Pandoc can convert between numerous markup and word processing formats, including, but not limited to, various flavors of Markdown, HTML, LaTeX and Word docx.For the full lists of input and output formats, see ...

## **reStructuredText Markup Specification**

reStructuredText is plaintext that uses simple and intuitive constructs to indicate the structure of a document. These constructs are equally easy to read in raw and processed forms. This document is itself an example of reStructuredText (raw, if you are reading the text file, or processed, if you are reading an HTML document, for example).
