## Reason

Reason is the capacity of consciously making sense of things, establishing and verifying facts, applying logic, and changing or justifying practices, institutions, and beliefs based on new or existing information. It is closely associated with such characteristically human activities as philosophy, science, language, mathematics and art, and is normally considered to be a distinguishing ...

## Logic

Logic (from the Ancient Greek: ??????, romanized: logik?) is the systematic study of the form of valid inference, and the most general laws of truth. A valid inference is one where there is a specific relation of logical support between the assumptions of the inference and its conclusion. In ordinary discourse, inferences may be signified by words such as therefore, thus, hence, ergo ...

## Emotional Competency

Our minds are wired to select and interpret evidence supporting the hypothesis “I’m OK”. A variety of mechanisms: conscious, unconscious, and social direct our attention to ignore the bad and highlight the good to increase our hope and reduce our anxiety. We work hard to retain the belief that “I’m OK” even when faced with significant losses.

## An Illustrated Book of Bad Arguments

The literature on logic and logical fallacies is wide and exhaustive. This work's novelty is in its use of illustrations to describe a small set of common errors in reasoning that plague a lot of our present discourse.
