## Psychology

Psychology is the science of behavior and mind (not to be confused with neuroscience, which studies the neural underpinnings of psychological phenomena ex. neural circuits). Psychology includes the study of conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope. Psychologists seek an understanding of the emergent properties of brains ...

## Feminist psychology

Feminist psychology is a form of psychology centered on social structures and gender. Feminist psychology critiques historical psychological research as done from a male perspective with the view that males are the norm. Feminist psychology is oriented on the values and principles of feminism.. Gender issues can include the way people identify their gender (male, female, genderqueer ...

## Understanding a Schema in Psychology

While Piaget focused on childhood development, schemas are something that all people possess and continue to form and change throughout life. Object schemas are just one type of schema that focuses on what an inanimate object is and how it works. For example, most people in industrialized nations have a schema for what a car is.

## How Common Is Masturbation, Really? | Psychology Today

An old joke observes that 98 percent of people masturbate--and the other 2 percent are lying. But according to a recent study based on a representative sample of American adults, only 38 percent of ...
