## Sweet potato

The sweet potato (*Ipomoea batatas*) is a dicotyledonous plant that belongs to the bindweed or morning glory family, Convolvulaceae. Its large, starchy, sweet-tasting, tuberous roots are a root vegetable. The young leaves and shoots are sometimes eaten as greens. The sweet potato is only distantly related to the potato (*Solanum tuberosum*) and does not belong to the nightshade family, Solanaceae ...

## DUCKWEED

Although traditional or staple crops can be produced from water bodies and in many situations traditional people often harnessed these resources, the aquatic habitat has been considered too costly and too difficult to farm other than for extremely high value crops such as algae harvested for high value materials such as beta-carotene or essential long-chain fatty acids.

## 2. FARM MANAGEMENT AND FARM TYPES

2.1.1 Scope. To a layman 'farm management' probably means just that - a body of activities and procedures carried out by a farmer in the ongoing management of his or her farm and for which advice may be available from professional specialists in farm management. 1 To an extent this is correct (as per farm management in Field A of Section 2.1.7) but, more broadly, farm management as considered ...

## **Yield gaps in oil palm: A quantitative review of ...**

Oil palm, currently the world's main vegetable oil crop, is characterised by a large productivity and a long life span (25 years). Peak oil yields of 12 t ha<sup>-1</sup> yr<sup>-1</sup> have been achieved in small plantations, and maximum theoretical yields as calculated with simulation models are 18.5 t oil ha<sup>-1</sup> yr<sup>-1</sup>, yet average productivity worldwide has stagnated around 3 t oil ha<sup>-1</sup> yr<sup>-1</sup>.

## **Science Nutrient Glossary | AdvoCare**

An important cellular component that is required for critical energy production steps taking place inside cells. The metabolic antioxidant, alpha-lipoic acid (LA), is a disulfide compound found naturally in plants and animals.

## **Monterey Bay Nursery plants**

burmanica (not currently in production) large leaves a clumping tropical timber bamboo, with glossy, dark green culms to a full 4" thick and growing to 30-50' tall. The leaves are especially lush and reach 2" across by over a foot long. It offers superb wood for construction, being hard and almost solid.

## **Liming impacts on soils, crops and biodiversity in the UK ...**

The UK government abolished a lime subsidy in 1977/78 and lime applications have declined since then. In recent years the production of agricultural lime has also declined in the UK (). During the 1980s and early 1990s between 3-4,000,000 tonnes of lime was produced annually, but over the last 10 years production has often been
